

# How to get Solar Analytics

Solar Analytics can be quickly and easily added to virtually any solar system. Your solar installer can help you choose the ideal solution and in some cases you can even connect remotely.

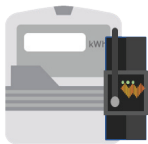

## Integrate with your inverter

Connect to your Goodwe, GE, Sungrow or Fronius inverter and consumption meters.

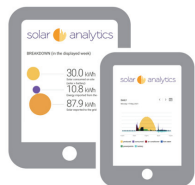

## Integrate with your meter

Connect to Wattwatchers hardware or selected retail energy meters

## Launch our app

Access your dashboard from any device, anywhere at any time.

# Why choose Solar Analytics

Solar Analytics is a multi award winning Australian software company founded more than a decade ago.

Our software is available for a free trial and - on average - saves customers \$400/year or more!

Let us do the hard work for you.

# Get more from your solar

Solar Analytics takes the guesswork out of managing your solar so you can relax and watch your savings grow.

# Everything you need to save more

Our Dashboard is full of clever, automated tools to help you manage and optimise your solar savings.

## Plan Optimiser

Take the guesswork out of choosing the right solar energy plan.

## True Performance

Make sure your solar is performing at 100%, and if its not we'll let you know.

## Savings Analysis

Track your payback and watch your savings grow.

## Battery Calculator

Know when it's the right time to invest and what the right size is.

## Energy Insights

Easily understand when you produce and use energy.

## More Savings

Get personalised, unbiased advice based on your energy usage, to help you choose the right energy plan and maximise your solar savings

### PLAN OPTIMISER

We have found a better plan for you. You could be saving:

**\$204.20**

PER QUARTER, BASED ON  
YOUR PREVIOUS 3 MONTHS  
OF ENERGY USAGE.

## More Confidence

We'll look after your system so you don't have to. Our patented algorithms calculate exactly how much energy your should produce.

### SYSTEM PERFORMANCE

Based on what we would expect from a system like yours.

Your System  
is performing  
as expected.

## More Control

Understand when you produce and use energy so you can shift your electricity usage and make the most of your solar.

### MY ENERGY USAGE

How much energy you buy and sell.
